

# Workforce

**Deployable GenAI teammates for all environments—mission-ready, no vendors, no compromise**

Workforce is Agile Defense Labs' Generative AI hub that fields reusable "AI Teammates" and orchestrated multi-agent Teams to augment analysts, planners, and operators. Integrated with the Flow layer for live data access, it delivers source-cited insights and actions while running securely in cloud, on-prem, or fully air-gapped environments.

## Mission Alignment

### Mission Need

Missions demand trusted AI assistance that respects data sovereignty.

### The Challenge

Generic chatbots lack context, security, and deploy-anywhere flexibility.

### Our Solution

Workforce provides governed, model-agnostic AI teammates that plug into mission data and run wherever the fight is.

## Key Benefits

Generate mission intelligence in minutes, not hours

Fuse real-time data with cited AI answers

Deploy securely across cloud, on-prem, edge

Eliminate vendor lock-in through model-agnostic design

Audit every AI action for compliance assurance

## Feature Breakdown

### Reusable AI Teammates & Teams

Users assemble a library of role-specific AI Teammates from intel analyst, watch-floor helper, policy drafter, and combine them into coordinated and orchestrated Teams for complex tasks. The platform handles context passing and task orchestration, letting human staff delegate cognitive work and iterate faster than manual methods.

### Deep Tool & Data Integration

Workforce connects to hundreds of data sources through Flow connectors; each Teammate can retrieve approved documents or trigger workflows mid-conversation. From Retrieval-Augmented Generation (RAG) to all of our Systems of Record (SOR) as Tools, your team can ground every answer in mission data, providing traceable citations and actionable follow-ons instead of standalone text.

### Model-Agnostic, Secure-Anywhere Architecture

Bring-your-own or classified LLMs slot into the same containerized stack, avoiding vendor lock-in and enabling rapid swaps as models evolve. Zero Trust guardrails, role-based access, and full audit logs maintain oversight, while the platform deploys identically in GovCloud, SCIF, or DDIL edge nodes without external dependencies.

## About Agile Defense

Agile Defense stands at the forefront of innovation, driving advanced capabilities and solutions tailored to the most critical national security and civilian missions. Whether developing specialized solutions, contextualizing data, or strengthening cybersecurity, our expertise is instrumental in safeguarding our nation's sensitive assets.
