NASA SEWP VI Ordering Guide

NASA Solutions for Enterprise-Wide Procurement (SEWP) VI is a multi-award Government-Wide Acquisition Contract (GWAC) vehicle. It features a $20B ceiling per prime contract and a 10-year ordering period. The GWAC core purpose is to streamline procurement of commercial IT, communications, audiovisual (ITC/AV) products, cloud, cybersecurity, and related professional services. The GWAC is divided into three segments.

SEWP VI Contract Number: 80TECH26D1255

Category B (Enterprise-Wide ITC/AV Service Solutions) with a period of performance of November 1, 2026-October 31, 2036

Ordering Process

Federal agencies follow their own internal procedures when initiating purchases under the NASA SEWP contract. Typically, an end-user identifies a requirement and prepares a Purchase Request (PR) with the appropriate funding information. The agency's procurement office then converts the PR into a Delivery Order (DO). SEWP does not issue Delivery Orders; all DOs must originate from the issuing agency in accordance with its established acquisition policies.

Once a DO or order package is prepared, it is submitted to the SEWP Program Management Office (PMO) via the designated SEWP submission channels (email or fax). The SEWP PMO logs the order, assigns tracking identifiers, and verifies that the CLINs and totals align with the information submitted during quoting. If discrepancies exist or required data is missing, the Contract Holder may be asked to correct or revalidate the information before the order can proceed.

After verification, the PMO forwards the order to the appropriate Contract Holder(s). Contract Holders must acknowledge receipt within one business day. Any subsequent modifications to an order—such as changes in funding, scope, or CLINs—must also be routed back through the SEWP PMO for processing.

Each order must include core information such as: the issuing and ordering agency details, order number, authorized ordering official's signature, accounting data, billing and shipping information, SEWP contract number, CLINs and product descriptions, total value, and any supporting documents such as statements of work or terms applicable to the order.

NASA SEWP VI SCOPE

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC/ AV) solutions and services. Technology is ever-evolving and for that reason SEWP's processes enable our Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape.

SEWP is composed of three (3) scope categories detailed below. If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and we will quickly review and provide feedback.

The SEWP Contracts were awarded by scope category, the three categories are:

- Category A - ITC/AV Solutions
- Category B - Enterprise-Wide ITC/AV Service Solutions
- Category C - Mission-Based ITC/AV Service Solutions

SEWP VI Agency Administrative Handling Fee

An Agency Administrative Handling Fee, not to exceed 0.34% of the total price of the delivery order, shall be applied to all orders under the SEWP VI contracts.

Fair Opportunity When Using SEWP VI

Federal agencies placing orders under SEWP must provide all contract holders with a fair opportunity to be considered for each order above the micro purchase threshold. Ordering procedures may be streamlined, but they must ensure transparent notice of requirements, consideration of price, and equal opportunity for qualified contract holders to compete. Exceptions to fair opportunity are permitted only in narrowly defined circumstances such as urgency, unique capabilities, logical follow on needs, or statutory direction, and must be documented in accordance with FAR 16.505(b). All ordering activities are required to maintain their supporting selection documentation and comply with debriefing and posting requirements where applicable.

About Agile Defense

Agile Defense stands at the forefront of innovation, driving advanced capabilities and solutions tailored to the most critical national security and civilian missions. Our experts are able to develop specialized solutions, contextualize data and provide leading edge cybersecurity tactics to safeguard our nation's most sensitive assets.

Speed

We understand the need for urgency in time-sensitive situations. Rapidly assessing, responding, and adapting to emerging problems and threats to safeguard national interests and protect citizens.

Flexibility

The world is ever changing and we must be prepared to change with it. We specialize in adapting to evolving landscapes and unforeseen challenges, ensuring the ability to navigate effectively in changing environments.

Ingenuity

We pride ourselves on being at the forefront of innovative thinking and creating new solutions. Empowering innovative solutions, strategic thinking, and adaptive approaches to powerfully secure and advance missions.

Global Reach

With operations in North America, Europe, Asia, and the Middle East, Agile Defense supports our customer missions around the world.

We serve over 50 customers across the DoD and Federal Civilian landscape with end-to-end innovative solutions. We ensure operational excellence by deploying our team where our customers need us most, from CONUS locations to mission-critical spaces across the global.
